SUMMARY

Final-year **B.Tech Computer Science** student (2022–2026) with strong proficiency in Data Structures and Algorithms and core subjects including **OOPS**, **DBMS**, **OS** and **CN**. Experienced in building full-stack applications using the **MERN stack**, TypeScript, and modern UI frameworks. Skilled in **backend development**, **REST APIs**, database design, and responsive UI development.

Education

JABALPUR ENGINEERING COLLEGE

2022 – 2026

Bachelor of Technology in Computer Science - **CGPA : 7.47**

Jabalpur, Madhya Pradesh

Experience

Full Stack Developer Intern

Feb 2026 – Present

Infosys Springboard (Virtual)

- Building Clean Street, a civic issue reporting and tracking platform for municipal complaints.
- Designing a MERN stack application supporting location-based complaint submission with images and descriptions.
- Implementing role-based access (user, volunteer, admin) with complaint assignment and status tracking.
- Developing community engagement features including voting and comments on reported issues.

Projects

Clean Street | MERN, Map API, Cloudinary

Github

- Developed a civic engagement platform enabling users to report issues such as garbage dumps, potholes, and water leaks using location and image uploads.
- Implemented real-time complaint tracking and volunteer assignment system.
- Added community voting and commenting to prioritize issues.
- Built an admin dashboard for complaint monitoring and analytics.

Brainly | TypeScript, Node.js, Express.js, MongoDB, ShadCN, Tailwind CSS, Cloudinary, OAuth

GitHub

- Developed a full-stack personal content organizer supporting 5+ content types with secure OAuth authentication.
- Integrated Cloudinary with memory-based file streaming to securely upload and delete media without local file storage.
- Implemented secure authentication, content creation, and unique content sharing via generated links.

Quiz JEC | JavaScript, Node.js, Express.js, React.js, Tailwind CSS, MongoDB, ShadCN, Electron.js, C++, Zod

- Collaborated with a team to develop a full-stack online examination system using the MERN stack and Electron.js.
- Built a teacher module for registration, login, test creation, result tracking, and test publishing.
- Developed a student module enabling users to log in, view available tests, and take exams in a controlled environment.
- Integrated Electron.js to convert the app into a desktop client that restricts tab switching, simulating an IIT JEE-style secure exam experience.

Technical Skills

Programming Languages: C, C++, JavaScript, TypeScript, Java, Python

Web Technologies: HTML, CSS, Tailwindcss, Bootstrap, ReactJS, NextJS, ExpressJS

Databases: MongoDB, PostgreSQL

ORMs and Tools: Prisma, Git, GitHub, Postman, VS Code

Core Subjects: OOPS, DBMS, OS, CN

Certifications and Achievements

- **Web Development Certification** : 100xDevs Cohort3
- **Open Source Contributions** : Github 2025.
- Solved **500+ Data Structures and Algorithms problems** across coding platforms such as GeeksforGeeks and LeetCode.
